SKILLS & TOOLS

- Node.js & ES6 syntax
- Microservices
- RESTful APIs using Express
- Git, GitHub & GitLab
- ELK stack (Elasticsearch, Logstash, Kibana)
- MongoDB & Postgres
- AWS SDK, EC2s, S3 Buckets
- Jest & Supertest
- Jira & Confluence
- Debugging and troubleshooting

WORK HISTORY

NodeJS Developer – Northwestern Mutual • 03/2022 – Current

- Create orchestrator-produced and client-requested test data and logs in Postgres
- Creation and maintenance of scheduler microservices used to trigger orchestrators
- Created charts and graphs from orchestrator data logs, including success/fail rate and trigger times using the ELK stack
- Implemented dynamic creation of user instances to access internal systems resulting in higher scalability, efficiency, and security for orchestrators
- Trained new developers and documented processes with Confluence
- Use of Node.js, Postgresql, Elasticsearch, Logstash, Kibana, GraphQL, Axios and Agile SCRUM methodology

NodeJS Developer – ANI Consulting • 08/2019 – 03/2022

- Built Excel and csv file processing system for extracting client data
- Developed a financial reporting application and income journal reporting
- Parsed client given Excel files to store financial data in MongoDB
- Created scripts to automatically open and shut down EC2s as needed for development
- Use of Node.js, MongoDB, JWT Tokens, AWS SDK, S3 Buckets, EC2s, Supertest, Jest, Docker & Docker Compose, .env files, Axios, Redis, and Agile SCRUM methodology
